MPA Name	Regional Goals/ Objectives	Site Specific Rationale	Other Considerations
UCSB_SMR_LAP_A_1	G1: (O-1,O-2,O-3,O-4,O-5), G2: (O-1,O-2,O-3), G3: (O-1,O-2,O-3), G4: (O-1,O-2), G5: (O-3,O-5), G6: (O-3,O-4)	Get better representation of hard bottom, kelp habitat, oil seeps, sandy bottom, high current area, coastal pelagics, and avoid some high use areas to east and also areas of soft bottom, get some estuary mouth west side of Coal Oil Point also, study opportunities for UCSB.	None Specified
Goleta_Slough_SMP_LAP_A_1	None Specified	Maintains existing MPA.	None Specified
Carpinteria_Salt_Marsh_SMR_LAP_A_1	G1: (O-1,O-2,O-3,O-4,O-5), G2: (O-1,O-2,O-3), G3: (O-1,O-2,O-3), G4: (O-1,O-2), G5: (O-1,O-2,O-3,O-4,O-5), G6: (O-1,O-3,O-4)	One of the most undamaged estuary systems, designated as a University of California Natural Reserve. Is habitat for myriad animals and plant species that are listed e.g. salt marsh bird's beak, migratory waterfowl, light-footed clapper rail, halibut, leopard sharks.	None Specified
Big_Sycamore_Canyon_SMR_LAP_A_2	None Specified	There is an existing MPA here, clean watershed, unpopulated, only stretch of really wild coast in southern California, it's a unique spot. A lot of sandy bottom and kelp.	Conforms to DFG feasibility guidelines. Currently there is a no-go area except for research that has been in place since 1994.
Malibu_East_SMR_LAP_A_1	None Specified	Over minimum size, it's an SMR, so it satisfies goals of acts and it leaves an area open nearby that has the same kind of habitat so there is the possibility to do side by side comparison research.	Minimizes socioeconomic impact and avoids an artificial reef. Also stays a distance away from the pier. Want to be at least just over 1/2 mile from Malibu pier so as not to interfere with activities/leaseholds there.
Portuguese_Bend_SMCA_LAP_A_1	None Specified	Puts in more robust protection than current protection (than at existing Abalone Cove SMP) and expands existing MPA.	None Specified
Point_Fermin_SMP_LAP_A_1	None Specified	Maintains existing MPA.	None Specified
Bolsa_Chica_SMP_LAP_A_1	None Specified	Maintains existing MPA.	None Specified

Irvine_Coast_SMCA_LAP_A_2	5604	South Mainland	North: mean high tide line South: 1000 ft. offshore and following shoreline East: landmark - two rocks or Seal Rocks [at edge of Heisler Park SMR]* West: West tip of Robert E. Badam SMCA *NOTE: 03/11/09 - Eastern boundary was adjusted to Two Rocks Point/Seal Rocks, which was actually north of Heisler Park SMR, to remain consistent with the intent of the author.	SMCA	TBD	Lobster: Traps / Pots: commercial, Urchin: Diving: commercial. All take is prohibited of intertidal species except commercial take of lobster, crab, urchin and Kellet's whelk	None Specified

MPA Name	Regional Goals/ Objectives	Site Specific Rationale	Other Considerations
Upper Newport Bay_SMP_LAP_A_1	None Specified	Maintains existing MPA.	None Specified
Irvine_Coast_SMCA_LAP_A_2	None Specified	Encompasses and would replace several existing MPAs. Meant to make those MPAs match more closely to DFG guidelines, and protect the intertidal areas.	Want to test the possibility of creating an intertidal MPA so that the intertidal is protected without having huge socioeconomic impacts (caused by extending to state waters line).
Laguna_SMR_LAP_A_1	None Specified	Encompasses virtually all habitat we're looking for, hard bottom, soft bottom, a lot of submerged kelp though little kelp canopy, meets SAT guidelines for habitat, out of G&O meets all but two of them, includes existing MPA.	<p>Important for lobster fishery but willing to sacrifice because of the important habitat. Half way between Newport Harbor and Dana Point Harbor so maximizes distance from ports (b/c very large # of users out of each port), economically will hurt lobsters, and some bait fishery, do fish it a lot but willing to give it up to meet guidelines.</p> <p>During the review process by Lapis, it was put forward that the intended SMR should be configured basically the same, but the western latitude boundary should be at 117d 48.2m and the eastern one at 117d 46.3m. This would avoid a major sewage outfall and significantly reduce negative socioeconomic impacts. Because this was a major change to the shape not put forward and discussed during the work session, the boundaries were left as noted originally.</p>

MPA Name	Regional Goals/ Objectives	Site Specific Rationale	Other Considerations
Famosa_Slough_SMR_LAP_A_1	None Specified	Need to ensure long term protection, lots of birds use this area, as do juvenile fish.	None Specified
Mia J Tegner_SMCA_LAP_A_1	None Specified	Maintains existing MPA.	None Specified
South_San_Diego_Bay_SMCA_LAP_A_1	None Specified	Lots of eelgrass (80% of eelgrass in bay), Sweetwater Reserve, nature center, educational opportunities, south bay protected area, marsh at edge, leave salt flats alone, part of fish and wildlife reserve. Green turtles would benefit, intertidal mudflats, salt marsh on east side, two least tern preserves and two federal reserve area lots of shorebirds and pelagic birds.	Already some enforcement and harbor patrol is there. Just south of DoD interests so does not interfere, already 5 mph zone but needs more enforcement. Consider moving lines to not include harbors and harbor access.
Catalina Marine Science Center_SMR_LAP_A_1	None Specified	Maintains existing MPA.	None Specified
Farnsworth_Bank_SMR_LAP_A_1	None Specified	Purple coral is present, it's a nice area, and there is already an existing MPA (same footprint) but this would increase protection.	It will hurt the yellowtail and rockfish anglers. Also, current regulations are depth based.
Avalon_Dive_Park_SMR_LAP_A_1	None Specified	The area is currently a city underwater park (same footprint as the current park). It is a heavy non-consumptive use area, especially by divers, and would like to preserve it for this use.	People are used to the area being an underwater park, and there are already marker buoys in place.
Lover's Cove_SMR_LAP_A_1	None Specified	Includes existing MPA with increased protection.	None Specified
